Profile

Experienced full-stack JavaScript developer since October 2019, specializing in front-end with a focus on React.js. Skilled in crafting clean code for attractive websites that work seamlessly with back-end systems. Proficient in improving user experiences and solving challenges. Always up-to-date with the latest front-end technologies. Looking to bring my skills to a collaborative team to create standout user-focused solutions.

Main Skills

- Front-End Development
- Back-End Development
- User Experience
- User Interface
- Responsive Design
- Web Performance Optimization
- Speaker / Writer

Tools & Languages

- Git, Github, Gitlab, Agile, VS Code, WebStorm

Work Experiences

May 2022 - Current

AjiCreative (Remote work)

Front end Developer

Project: Beegup - Social Language Learning Network

Contributed to the creation of Beegup, a unique social network for language learners. Responsible for implementing UI mockups, integrating front-end with backend systems.

- Translated UI mockups into responsive interfaces using Nuxt.js.
- Collaborated with backend developers for seamless data integration.
- Added interactive features (classes interactions, groupes member, instructional additions) for better user engagement.
- Improved data fetching, faster network requests.

Sep 2021 - Jun 2022
web Lakeland (office)

- Worked with AI team, improved content analysis for feed posts.

Technologies : Vue.js Nuxt.js Node.js Nest.js Prisma Tailwind css
Headless UI Vuetify socket.io

Project: Sheedn - Social Relationship Platform

I was involved in developing Sheedn, a mobile social media app that lets users connect and establish new relationships through matching, similar to Tinder. I played a crucial role in creating a central CRM dashboard for the platform.

- Developed a comprehensive CRM dashboard to streamline user management.
- Implemented user profile parameterization for customized experiences.
- Created a user reporting and moderation system to maintain platform integrity.
- Integrated subscription management via Stripe, offering various plans.
- Configured free trial options and automated invoicing for subscriptions.

Technologies : React.js scss Shadcn/ui Stripe PHP Symfony

Project: Placetoplan - Interactive Buffet Composition Platform

I had a big role in Placetoplan, an interactive platform for making custom buffets and events. I designed easy-to-use layouts, secured online shopping with Shopify's backend, ensured secure data, and gave excellent customer service.

- Developed intuitive interfaces for personalized buffets and event creation.
- Implemented secure e-commerce functionality using Shopify for both storefront and checkout processes.
- Provide detailed client assistance in choosing table accessories and decorations.
- Utilized the Framer Motion library for user interface animations to enhance user engagement.

Technologies : React.js Next.js Shopify Tailwind css Framer motion

Full stack Developer

Project: SpamBurner - CRM SaaS Spam Detection and Management

Engaged in the SpamBurner project focused on enhancing website lead management and preventing spam. Collaborated closely with cross-functional teams, including developers, designers, and analysts, to develop a robust solution.

- Collaborated actively with a diverse team to steer and innovate the Spamburner project's direction through brainstorming.

- Contributed to the development of functionalities aimed at identifying and blocking unwanted website submissions.
- Designed an intuitive user-centric dashboard interface, unifying website leads and submissions
- Engaged in Search Engine Optimization processes to ensure platform reliability and optimal performance.
